-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, and 7 are rejected under 35 U.S.C. 102(a) as being anticipated by Falge (2,814,749).

In regard to claim 1, Falge discloses a base 2 and lighting device with two light members 18 and 26 for high and low beams respectively and leads 50, 52, and 54 for

controlling the light members. In regard to claim 2, Falge discloses a cover 30. In regard to 4 Falge discloses the use of bulbs with 4 leads (2 for each bulb) in column 4 lines 8-10.

In regard to claim 7, Falge teaches the use of two lighting members located at different locations relative to the base of the device.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Falge in view of Coushaine (5,291,092).

In regard to claim 3, Falge discloses the elements of independent claim 1, including a controlling means for the high and low beams, but lacks the teaching of tubes coupled to light members. Coushaine teaches a headlight device 12 including an arc discharge lamp with tube 16 coupled to leads 18 and 20. This lamp is used in headlights to improve optics (col. 1 lines 16-17).

It would have been obvious to one of ordinary skill in the art at the time of the invention to use the arc discharge lamp of Coushaine in place of each of the lamps of Falge, in order to improve optics as taught by Caushaine.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Falge in view of Douglas (2,076, 074).

Art Unit: 2875

In regard to claim 5, Falge discloses the elements of claim 1, including a controlling means for the high and low beams, but lacks a control device coupled to the light device. In regard to claim 6, Falge discloses light member stabilized with a mount in the reflector. Douglas discloses the use of a controlling means S.

It would have been obvious to one of ordinary skill in the art at the time of the invention to combine Falge's lighting device with Douglas's controls as a means to control the different beam settings.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Irshawa (5,059,855) discloses the use of a ceramic tube in a discharge lamp.
